

Removing rules and protections of the broadcast ownership is a very bad and dangerous idea. It will remove variety, diversity, freedom of choice, democracy, and entrepreneurial capitalism from our pursuits in the broadcast industry as free Americans. By allowing these large conglomerates to grow and eradicate opportunities for small businesses and creative individuals to grow and shape our world, we lose our means of expression, individuality, freedom and choice via broadcast. The broadcast industry becomes one big homogenous blob. Very sad and anti-American. Please do not let this happen any further.
